Some details may differ from the specifications described here and the illustration, but have no negative influence on the functionality.

System Specifications

The memory is 100% compatible with this sytem:

Supermicro			
Server-Mainboard			
Mainboard X			
X10 Serie			
X10SDV Serie 128GB 4			
			You can use either ECC UDIMM or RDIMM memories. These two different technologies can not be operated together in the system.

^{*}The specifications for the maximum memory upgrade may differ from those of the manufacturer Supermicro. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.
