overRAMing - maximize your RAM

Most systems - including the Lenovo ThinkSystem ST50 (7Y49) - can be upgraded with more memory than originally specified by the device manufacturer.

Therefore, our memory specialists continuously analyze new memory solutions in selected systems. Due to improved manufacturing technologies, new memories with higher performance and capacity will be tested for stability and functionality.

Then the new memory solutions are released for the respective systems. Use the benefits of larger computer memory capacity with the PHSmemory® overRAMing memory solutions.

Information on memory allocation

Beim Systemstart wird bei diesem System eine spezielle memoryabfrage gestartet. Die memory des Systemherstellers (manufacturer Original) besitzen neben den technischen Kennziffern noch eine manufacturernummer.

Product Datasheet | SP468348 32GB Computer memory for ThinkSystem ST50 (7Y49)

Anhand der manufacturernummer erkennt das System die memory als "qualifiziert"
Bei den kompatiblen memoryn ist diese manufacturernummer nicht vorhanden. Die technischen Kennziffern sind identisch.
Beim Einsatz der kompatiblen memory muss beim Systemstart eine Meldung per F2 Taste bestätigt werden.
Nach dieser Bestätigung funktionieren die kompatiblen memory ebenfalls problemlos im System.

Information on memory installation

- Turn off the system
- Remove the plug of the power supply unit (if connected)
- Remove the battery, according to the user manual of the system
- Always ground yourself before touching electronic components
- Protect the memory module from static voltages:
 - Do not touch the gold pins of the memory module
 - Only touch the sides of the memory module
 - Use a grounding strap and/or ESD glove if possible

General installation instructions are supplied by E-Mail.
